

Kenny's Song by Craig Colley

Tempo: 115

This song was recorded to a click track which stopped prior to the end retard or slow down on the piece.

Three sequence files are included in different formats - AFF, OMF & XML (separate zip file download). There are no plugins in the mixing board setup. The channels are labeled with the same names as the audio tracks and in the order I used and referenced in my 'How to Record A Song From Start to Finish' 24 part video series.

Using any DAW, simply import the audio in the 'Kennys Song Individual Tracks' folder into a new session. The tracks have been exported from the starting point so they should line up correctly. You will see blank space at the top on every track. A few of the tracks are shorter at the end but all the audio is there.

I have also included 4 mixes for reference and practice when working on mastering.

I hope you enjoy mixing this session!

Contact me at mastersmusic@craigcolleymusic.com if you would like more recording, plugin and mixing/mastering info or leave a comment #craigcolleymusic.

Have fun mixing!
Craig Colley

PS I would love to hear your mixes. Please send me a link!
